

## FIRST CHECK DESKTOP COLOR PROOFER

# An **Easy-to-use** Proofer for the Packaging Industry.

The highest quality color reproduction at a cost so affordable it will pay for itself.

Increasing pressures for better quality, higher productivity and quicker turnaround make it important that you obtain a high-quality, color-accurate packaging proof as early in the process as possible. And when you hand your mock-up to the customer, you want it to have the look and feel of the real thing.

The Kodak Polychrome Graphics First Check Desktop Color Proofer is the first proofing system with a true graphic arts RIP to create high-quality, economical proofs right at your desktop. Now you can experience professional proofs and mockups in-house, with faster turnaround that traditional agencies usually take days to provide.

### High-quality desktop proofs

- ◆ Define the spot colors you want.
- ◆ Reproduce foils and metallics onto any substrate – right from the proofer!
- ◆ Enjoy accurate, consistent color with a full palette of color options and expanded color gamut.

### Easy to use

- ◆ Proof directly to your job stock, with no more outsourcing proofs for comp production and worries about color match.
- ◆ Proof to clear substrate or shrink film.

### Calibration-free color

- ◆ Delivering the appropriate color accurately even with different batches of ribbons.
