

The **Industry Standard** in Inkjet Proofing Media

Did you know that your inkjet proofing paper can make or break your proof?

Media is one of the most important variables in inkjet printing and proofing. Not only does the paper represent the fifth color in your proof, it also affects many parameters of proof performance including productivity, color stability, text, image quality, durability and overall look and feel. We've taken these variables into account so that Matchprint inkjet media performs to the highest standards.

Matchprint ProofPro Inkjet Media/Pigment is designed specifically for creating Matchprint inkjet proofs from your inkjet printer with pigment inks and your Matchprint RIP. With the Matchprint inkjet media and RIP solution, you can generate proofs that have a luxurious expensive feel, and accurate and true colors at a fraction of the price.

- ▶ **Instant dry for maximum productivity and no chance of smudging**
- ▶ **Consistent and repeatable image quality and color**
- ▶ **Accurate color realized instantly, right off the printer**
- ▶ **Robust color stability for long lasting proofs**
- ▶ **Premium feel of expensive looking proofs, without the expense**
- ▶ **Available in three tints – SuperWhite, Commercial, Publication**
- ▶ **Featuring the genuine Matchprint watermark for authenticity**
- ▶ **Moisture and scratch resistant for more durable proofs**
- ▶ **Use with Matchprint Color RIP software or Matchprint ProofPro RIP for best results**

Take Advantage of the Productivity Inkjet Offers.
